DETAILED ACTION

Allowances

1. Claims 1-33 are allowed.
2. The following is an examiner's statement of reasons for allowance:

As of the date of this office action, the examiner has not located or identified any reference that can be used singularly or in combination with another reference including the closest prior art of Muhle et al. (US 5,672,666) and Bybee et al. (WO 00/58377) to render the present invention anticipated or obvious to one of ordinary skill in the art.

Both closest prior art Muhle et al. and Bybee et al. are related to methods of transitioning from a first polymerization catalyst system to a second polymerization catalyst system that is incompatible to the first. However, Muhle et al. and Bybee et al. are silent "removing the contents of said first polymerization reaction from the gas-phase reactor while maintaining a substantially closed system". Therefore, it would not be apparent to one of ordinary skill in art to use the teachings of Muhle et al. and Bybee et al, each and individually or in combination to obtain the invention of claims 1-33. Claims 1-33 are allowed.

Art Unit: 1713

In light of the above discussion, it is evident as to why the present claims are patentable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, and to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
